SUMMARY

Motivated and detail-oriented Cybersecurity student with a strong foundation in network security, ethical hacking.
Passionate about solving real-world security challenges through CTF competitions and hands-on projects. Skilled in Python, Bash scripting, and network analysis tools. Quick learner with a proactive mindset, continuously expanding knowledge in system vulnerabilities, scripting, and threat detection.

PROJECT

ScanX
github.com/Tareq-Abukhashabeh/scanX · April 2025 – April 2025
· **Network Security Scanner**Designed and developed an advanced Bash-based network reconnaissance tool for scanning, vulnerability detection, and web intelligence gathering.
· Automated scanning of IP ranges to detect open ports and services using Nmap.
· Integrated Whois and DNS lookups for enhanced recon.
· Added modules to detect weak HTTP headers, outdated software, and default configurations.
· Logged scan results into structured reports for further analysis.
· Used in CTF and lab simulations to identify exploitable misconfigurations.

Fake Email Detector
github.com/Tareq-Abukhashabeh/fake-email-detector · March 2025 – April 2025
· A Chrome extension that detects fake and phishing emails.

EDUCATION

Cyber security
Al-Zaytoonah University of Jordan · Jordan,Amman-Airport st · 2026 · 87.6

COURSEWORK

Certified Cybersecurity Technician |CCT
Online, Still taking it · 2025 · Ethical Hacking and tools in network
· ScanX Project

SKILLS

Front End: Html, CSS, JavaScript
Python : Basic
Java : Intermediate
Bash script : Basic
MySQL : Basic
Networking : Intermediate
Security : Advanced
Computer Tech : Intermediate
